

T2

BLUE

Home insurance
doesn't cover
termite damage.
But we do.

T2 BLUE PRODUCT GUIDE

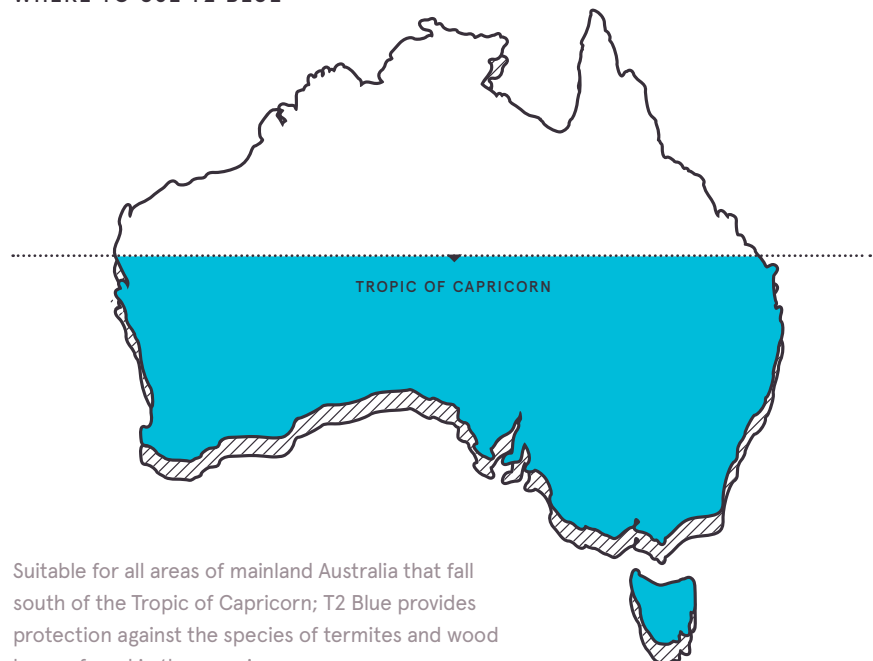

Why T2 Blue?

Building a new home is one of the most important financial commitments you and your family will ever make, so it makes sense to protect your investment against the threat of termite and borer infestation. There's no replacing the structure of your home, so it's important you get it right the first time. Put T2 Blue to work for you, and we guarantee it will keep working for the next 25 years.

MORE OVERLEAF

WHERE TO USE T2 BLUE

Suitable for all areas of mainland Australia that fall south of the Tropic of Capricorn; T2 Blue provides protection against the species of termites and wood borers found in these regions.

For areas north of the Tropic of Capricorn, ask for Hyne Timber T2 Red.

The Facts: Termites & Borers

There are over 350 species of termites, white ants and borers in Australia

T2 Blue is recognised as the leading termite resistant timber framing

The treatment is CodeMark® Australia certified for quality and conformity

Termites don't like the sun, and will tunnel up to 50 metres in search of food and shelter

Your home insurance policy won't cover damage caused by termites

Termites are estimated to cause more damage than fire and storms combined

Every piece of T2 Blue is graded to meet the Australian performance standard.

T2 Blue protects your home from the inside out, so you don't need to worry about chemical sprays around your home.

FAMILY FRIENDLY

Safe for you, your family, and your pets. Our treatment is approved by the APVMA and is not considered to be carcinogenic, mutagenic, reproductive, sensitising, or a hazard to humans and mammals alike.

ORGANIC FORMULA

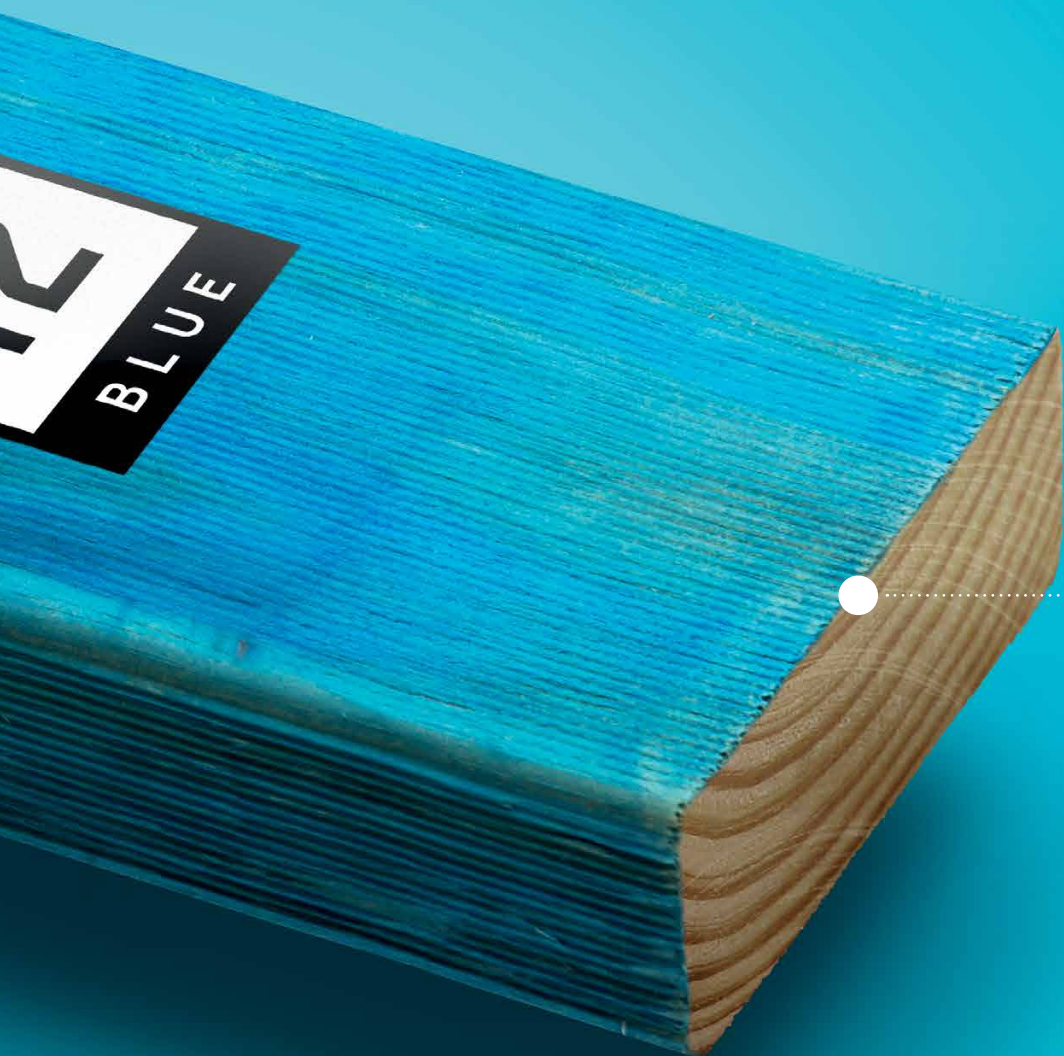

Don't let the word 'organic' fool you. Our treatment is tough, and designed to mimic the termite resistant properties of some plant species found in nature. Its active ingredients are similar to those used in flea collars and human head lice shampoos.

LOW MAINTENANCE

Unlike other termite systems such as barriers, meshes and chemical sprays, T2 Blue requires little to no attention thereafter. We simply recommend you adopt a common sense approach to maintaining your home and its surrounds. Set and forget.

WALLET FRIENDLY

Compared with other termite systems, T2 Blue not only has a low setup cost but no ongoing costs. And with no annual inspections or maintenance required, T2 Blue really is a hassle free solution.

■ Our treatment penetrates the timber fibres, providing long-term protection to your most valuable asset.

PEACE OF MIND

Low maintenance, and guaranteed for 25 years. Homeowners and renovators can rest easy knowing that the structural framing of their house is protected from termite damage - when built with T2 Blue.

INDEPENDENTLY CERTIFIED

Don't just trust us. T2 Blue has achieved independent CodeMark® Australia certification which means you can be sure of its quality, consistency and conformance with the Building Code of Australia (BCA).

SUSTAINABLY GROWN

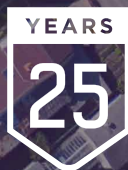

Our Australian plantation pine is sustainable, with a lower net environmental impact than most other building materials. It offsets greenhouse gas emissions when used as a direct replacement for steel, concrete or LOSP treated timber products.

A PROVEN PERFORMER

For over 134 years Australian homes have been built with Hyne Timber framing. So we know a thing or two about protecting your investment in the long-term.

Protecting 350,000 homes and counting...

We stand by our product, in fact, we've never had a claim. Our 25 year guarantee is fully transferable, offering you, and future owners, the ultimate peace of mind.

FAQ's

Is T2 Blue safe?

Yes. T2 Blue is safe for all mammals, including humans.

How do I tell if it's T2 Blue?

It's blue and marked at regular intervals with the Hyne Timber brand.

Will T2 Blue corrode metal fittings or fasteners?

No. Normal steel nails and plates are suitable for use as fixings.

How long does the treatment last?

T2 Blue is formulated to last for the normal economic life of a home.

Can I cut it?

Yes. It can also be notched or drilled without any need for resealing. T2 Blue must not be re-sawn, ripped or heavily planed without resealing the exposed surfaces.

Is it environmentally friendly?

Yes. Our timber is sustainably sourced and greenhouse positive, plus our organic treatment is petrochemical free.

Where in the home can T2 Blue be used?

Indoors, above ground only as either an alternative or to complement termite barrier systems.

What should I do with the offcuts?

You should be able to dispose of offcuts through normal trade waste collection services. For large volumes check with your local waste service authority for disposal restrictions.

Does it meet Australian Building Codes?

You bet. T2 Blue is independently audited and has achieved CodeMark® certification and therefore conforms to the ABCB Building Code of Australia.

Where in Australia can it be used?

It is not recommended or guaranteed for use north of the Tropic of Capricorn.
