

HYNE TIMBER

A revolution in
treated timber

A treatment that defies all odds.

They'll tell you it can't be done. That a safe, water-based treatment can't protect timber to a level that will withstand the great Australian outdoors. That what we're claiming is impossible. But then again, everything is technically "impossible" – until it's done.

MORE OVERLEAF

T3 Green Plus has been developed for use in indoor and outdoor above ground applications including deck and verandah bearers and joists; pergola, verandah and carport rafters and battens; verandah and patio beams; and kitchens, bathrooms and laundries. The treatment is naturally approved for use in outdoor furniture and playground equipment.

All timber products used in outdoor environments should be coated with a paint or stain finish, to protect it from the elements.

Introducing T3 Green Plus.

In 2006, Australia met Hyne Timber's T3 Green – an organic, strong timber for the great outdoors. Now, we've made it even better.

T3 Green Plus is a revolution in treated timber. It's still resistant to the elements, termites and fungal attack, with the added plus of being completely free of petrochemical VOCs in order to maintain the pleasant, natural scent of timber.

Guaranteed to protect against termites and fungal attack.

No VOCs. Low odour. Safe for indoors as well as out.

More environmentally friendly than ever.

There are over 350 species of termites, white ants and borers in Australia. T3 Green Plus protects your structure from the inside out.

T3 Green Plus will remain straight and stable in service.

Our treatment penetrates both sapwood and difficult-to-treat heartwood fibres.

**Indoors plus outdoors. Safe plus strong.
With a water-based treatment that goes above
and beyond Australian Standards, T3 Green Plus
is the next generation in H3 treated timber.**

**IT'S TREATED
TO THE CORE** +

Our treatment penetrates both sapwood and heartwood fibres, providing superior protection to your structure. All treatment levels meet or exceed Australian Standards requirements and timber industry conventions.

**IT CAN BE
USED INDOORS** +

Safe as houses. Unlike other low odour H3 treated products, T3 Green Plus has no VOC emissions, making it safe for indoor use and ideal for wet or humid areas like kitchens, laundries and bathrooms.

**IT'S BETTER FOR
THE ENVIRONMENT** +

Our new treatment is water-based and free of petrochemicals. It's one of the safest and most environmentally-friendly timber treatments available in the Australian market today.

**IT PROTECTS AGAINST
TERMITES AND ROT** +

Our treatment is tough, organic and proven protection against the most aggressive termites, as well as severe tropical decay and rot.

■ A natural colour and finish will produce a better-looking result with a stain or clear coating.

■ T3 Green Plus products meet or exceed Australian Standards, with a high treatment level at their core.

IT'S SUSTAINABLY GROWN +

Our Australian plantation pine is sustainable, with a lower net environmental impact than most other building materials. It offsets greenhouse gas emissions when used as a direct replacement for steel or concrete.

IT'S A PROVEN PERFORMER +

For over 134 years Australian homes have been built with Hyne Timber framing. So we know a thing or two about protecting your investment in the long term.

IT'LL LAST A LIFETIME +

We stand by our timber. Like all Hyne Timber products, T3 Green Plus is guaranteed for up to 25 years when installed and maintained correctly, offering you ultimate peace of mind.

IT'S INDEPENDENTLY CERTIFIED +

Don't just trust us. T3 Green Plus has achieved independent CodeMark® Australia certification which means you can be sure of its quality and conformity with the Building Code of Australia (BCA).

Treat it right and it'll go the distance

T3 Green Plus is guaranteed for up to 25 years. The following guidelines are essential for prolonging the life of your structure.

Reseal any cut, notched, planed or drilled surface with a fungal-resistant treatment preservative

Where used outdoors; protect it from the elements with a suitable timber coating product

Cover deck joists with a water resistant malthoid strip

Watch out for water and manage ventilation

Ventilation is essential in the fight against fungal attack

Ensure water can run off and cannot pool on the timber surface

FAQ's

What is T3 Green Plus?

An all new, water-based, H3 treated structural timber framing product.

What makes it so special?

Firstly, it doesn't smell. But unlike other "low odour" H3 treated products, T3 Green Plus has no VOC emissions, making it safe for use indoors and out.

So it's safe. But is it durable?

Sure is. With both heartwood and sapwood penetration, T3 Green Plus is treated to a level that meets or exceeds Australian Standards.

What's in the treatment?

Ingredients commonly used to protect food crops from pests as well as organic fungicides.

Is it environmentally friendly?

More than ever. It's petrochemical free, making it one of the safest and most eco-friendly treated timber products available today.

Is it BCA compliant?

Yes. Hyne Timber prides itself on quality. T3 Green Plus is independently quality assured with CodeMark® Australia certification and therefore conforms to the BCA.

Do I have to paint or stain it?

All timber used in outdoor, weather exposed applications should have a suitable coating applied. Please refer to our Technical Data Sheet #6 for more information.

How do I tell if it's T3 Green Plus?

It's a new and improved natural olive green and marked at regular intervals with the Hyne Timber brand. The natural colour and finish will produce a better-looking result when stained or painted.

What should I do with the offcuts?

You should be able to dispose of offcuts through normal trade waste collection services. For large volumes check with your local waste service authority for disposal restrictions.
